

VETIVER

Vetiver is a naturally aromatic root with a soothing scent and the oil is used to make perfume & other spa products. It's healing, aromatherapy traits are stress reduction and relaxation. Like cedar, vetiver is also used to keep away moths. In Indonesia, grandmas in the village often put some vetiver in the cupboard where they store their best ceremonial sarongs.

All our vetiver products are hand made in village cooperatives or fair trade, traditional workshops in Bali & Java, Indonesia

Because of it's deep growing & tightly meshed root system, vetiver is also used by the East Bali Poverty Project, Zen Zen Forest Conservation Club, and other conservation and community development projects to stop erosion in deforested areas.
